Subject Index of Volume 8

Action spectra
spectral sensitivity, structure and activation of eukaryotic rhodopsins: activation spectroscopy of rhodopsin analogs in *Chlamydomonas*, 385
Adaptation
functional changes in the photosynthetic apparatus during light adaptation of the green alga *Chlorella fusca*, 63
Artificial membranes
photoinduced interaction of thionine with phospholipid and cholesterol in artifical membranes, 295

B806–866 antenna complex
isolation and protein chemical characterization of the B806–866 antenna complex of the green thermophilic bacterium *Chloroflexus aurantiacus*, 189
Bacterial reaction centre
electron transfer and proton uptake of photosynthetic bacterial reaction centre reconstituted in phospholipid vesicles, 263
Bacteriorhodopsin
fluorescence studies on anthryl bacteriorhodopsins, 325
1,2-Benzenedicarboxalaldehyde
interaction of isoindole derivatives with compounds acting as electron scavengers, 89
Benzocaine
coloured complexes of all-*trans*-retinal with benzocaine and other local anaesthetics, 183
Beta vulgaris
effect of ultraviolet radiation and visible light on growth, fluorescence induction, ultraweak luminescence and peroxidase activity in sugar beet plants, 73
Bilayer lipid membrane
photosensitized damage of bilayer lipid membrane in the presence of haematoporphyrin dimethylether, 315
Bioluminescence
luminescence spectra of exponential and stationary phase cultures of respiratory deficient *Saccharomyces cerevisiae*, 169
Bixin
interaction between singlet oxygen and biologically active compounds in aqueous solution. III. Physical and chemical $^1O_2$-quenching rate constants of 6,6′-diapocarotenoids, 51

C-phycocyanin
UV–visible absorption and circular dichroism spectra of the subunits of *C*-phycocyanin. II: A quantitative discussion of the chromophore–protein and chromophore–chromophore interactions in the subunit, 129
Cancer
the possible role of ionic species in selective biodistribution of photochemotherapeutic agents toward neoplastic tissue, 1
Cataract
sodium and potassium in the lens after exposure to radiation in the 300 nm wavelength region, 279
Chlamydomonas reinhardtii
spectral sensitivity, structure and activation of eukaryotic rhodopsins: activation spectroscopy of rhodopsin analogs in *Chlamydomonas*, 385
Chlorella fusca
functional changes in the photosynthetic apparatus during light adaptation of the green alga *Chlorella fusca*, 63
Chloroflexus aurantiacus
isolation and protein chemical characterization of the B806–866 antenna complex of the green thermophilic bacterium *Chloroflexus aurantiacus*, 189

Elsevier Sequoia/Printed in The Netherlands

Chloroplast development
incorporation of photoreduced protochlorophyll into reaction centres, 255
Cholesterol
photoinduced interaction of thionine with phospholipid and cholesterol in artifical membranes, 295
Circular dichroism
UV–visible absorption and circular dichroism spectra of the subunits of *C*-phycocyanin. II: A quantitative discussion of the chromophore–protein and chromophore–chromophore interactions in the subunit, 129
Clematis plantlets
a study of the chlorophyll fluorescence from mature and micropropagated *Clematis* by time-resolved spectroscopy, 307
Cycloaddition
photobinding of psoralens to DNA in the dark by triplet ketones generated thermally from dioxetanes, 431
Cyclobutane cleavage
electron-acceptor-sensitized splitting of cyclobutane-type thymine dimers, 27

6,6′-Diapocarotenoids
interaction between singlet oxygen and biologically active compounds in aqueous solution. III. Physical and chemical $^1O_2$-quenching rate constants of 6,6′-diapocarotenoids, 51
Dioxetanes
photobinding of psoralens to DNA in the dark by triplet ketones generated thermally from dioxetanes, 431
DNA
photobinding of psoralens to DNA in the dark by triplet ketones generated thermally from dioxetanes, 431
synergism between electricity and ionizing radiation, 371

Electron transfer
electron transfer and proton uptake of photosynthetic bacterial reaction centre reconstituted in phospholipid vesicles, 263
fluorescence studies on anthryl bacteriorhodopsins, 325
interaction between singlet oxygen and biologically active compounds in aqueous solution. III. Physical and chemical $^1O_2$-quenching rate constants of 6,6′-diapocarotenoids, 51
nanosecond fluorescence of chloroplasts as a probe for electron transfer disruption in photosystem II, 175
Environmental stress
UV radiation as an environmental stress in plants, 337

Fluorescence
fluorescence studies on anthryl bacteriorhodopsins, 325
photobinding of psoralens to DNA in the dark by triplet ketones generated thermally from dioxetanes, 431
Fluorescence decay
variation in the fluorescence decay properties of haematoporphyrin derivative during its conversion to photoproducts, 103
Fluorescence induction
effect of ultraviolet radiation and visible light on growth, fluorescence induction, ultraweak luminescence and peroxidase activity in sugar beet plants, 73
Fluorescence quenching
interaction of isoindole derivatives with compounds acting as electron scavengers, 89
Fluorescent dyes
potential use of a charge-coupled device camera for imaging fluorescent dyes *in vivo*, 440
Free radicals
radical intermediates induced by porphyrin triplets, 97
Furocoumarins
photosensitizing action of furocoumarins on membrane components and consequent intracellular events, 235

Green photosynthetic bacterium
isolation and protein chemical characterization of the B806–866 antenna complex of the green thermophilic bacterium *Chloroflexus aurantiacus*, 189

He–La cells
intracellular sensitizer fluorescence: microfluorometry and fluorescent spectroscopy, 39

Heat emission
increased heat emission and its relationship to the xanthophyll cycle in pea leaves exposed to strong light stress, 361
Hematoporphyrin
comment on "A guide to the terminology of hematoporphyrin-catalyzed photosensitization" (Michael A. J. Rodgers, *J. Photochem. Photobiol. B: Biol.*, *5* (1990) 525) — a comment, 341
intracellular sensitizer fluorescence: microfluorometry and fluorescent spectroscopy, 39
use of hematoporphyrin in photodynamic therapy, 439
Hematoporphyrin dimethylether
photosensitized damage of bilayer lipid membrane in the presence of haematoporphyrin dimethylether, 315
Hydrogen peroxide
monitoring oxygen reduction by photosystem I in whole thylakoid membranes using a photoelectrochemical cell, 17
Hydroperoxides
radical intermediates induced by porphyrin triplets, 97
Hyperthermia
temperature effects on photosensitized processes, 419

Inhibitors
nanosecond fluorescence of chloroplasts as a probe for electron transfer disruption in photosystem II, 175
Isoindole
interaction of isoindole derivatives with compounds acting as electron scavengers, 89

Laser microfluorometry
intracellular sensitizer fluorescence: microfluorometry and fluorescent spectroscopy, 39
Lens
sodium and potassium in the lens after exposure to radiation in the 300 nm wavelength region, 279
Light quality
functional changes in the photosynthetic apparatus during light adaptation of the green alga *Chlorella fusca*, 63
Lipoprotein receptor pathway
the role of the low density lipoprotein receptor pathway in the delivery of lipophilic photosensitizers in the photodynamic therapy of tumours, 351
Local anaesthetic
coloured complexes of all-*trans*-retinal with benzocaine and other local anaesthetics, 183
Luminescence
luminescence spectra of exponential and stationary phase cultures of respiratory deficient *Saccharomyces cerevisiae*, 169

Mastigocladus laminosus
UV–visible absorption and circular dichroism spectra of the subunits of *C*-phycocyanin. II: A quantitative discussion of the chromophore–protein and chromophore–chromophore interactions in the subunit, 129
Membrane components
photosensitizing action of flurocoumarins on membrane components and consequent intracellular events, 235
Membrane damage
photosensitized damage of bilayer lipid membrane in the presence of haematoporphyrin dimethylether, 315
Membrane permability
role of tocopherols in the protection of biological systems against oxidative damage, 211
Metalloporphyrin
detection and quantitative estimation of metalloporphyrins *in vivo*, 409
Mitogenetic radiation
luminescence spectra of exponential and stationary phase cultures of respiratory deficient *Saccharomyces cerevisiae*, 169

Nanosecond fluorescence
nanosecond fluorescence of chloroplasts as a probe for electron transfer disruption in photosystem II, 175

Neonatal jaundice
photochemical and photosensitizing properties of monomeric and dimeric Sn(IV)-protoporphyrin, 159
NSAID
photodegradation of piroxicam under aerobic conditions. The photochemical keys of the piroxicam enigma?, 199

Ozone depletion
photobiology and the ozone layer, 113

Peroxidase
effect of ultraviolet radiation and visible light on growth, fluorescence induction, ultraweak luminescence and peroxidase activity in sugar beet plants, 73
pH micrometry
intracellular sensitizer fluorescence: microfluorometry and fluorescent spectroscopy, 39
Phospholipid
electron transfer and proton uptake of photosynthetic bacterial reaction centre reconstituted in phospholipid vesicles, 263
photoinduced interaction of thionine with phospholipid and cholesterol in artifical membranes, 295
Photoacoustics
increased heat emission and its relationship to the xanthophyll cycle in pea leaves exposed to strong light stress, 361
Photoautotrophy
a study of the chlorophyll fluorescence from mature and micropropagated *Clematis* by time-resolved spectroscopy, 307
Photobinding
photobinding of psoralens to DNA in the dark by triplet ketones generated thermally from dioxetanes, 431
Photobleaching
variation in the fluorescence decay properties of haemetoporphyrin derivative during its conversion to photoproducts, 103
Photocurrent
monitoring oxygen reduction by photosystem I in whole thylakoid membranes using a photoelectrochemical cell, 17
Photodegradation
photodegradation of piroxicam under aerobic conditions. The photochemical keys of the piroxicam enigma?, 199
Photodynamic therapy
inflammation and photodynamic therapy, 340
potential use of a charge-coupled device camera for imaging fluorescent dyes *in vivo*, 440
potentiation of photodynamic therapy in mice with recombinant human tumor necrosis factor-α, 203
the possible role of ionic species in selective biodistribution of photochemotherapeutic agents toward neoplastic tissues, 1
the role of the low density lipoprotein receptor pathway in the delivery of lipophilic photosensitizers in the photodynamic therapy of tumours, 351
use of hematoporphyrin in photodynamic therapy, 439
Photoelectrochemical cell
monitoring oxygen reduction by photosystem I in whole thylakoid membranes using a photoelectrochemical cell, 17
Photofrin II
potentiation of photodynamic therapy in mice with recombinant human tumor necrosis factor-α, 203
Photoinduced phenomena
photoinduced interaction of thionine with phospholipid and cholesterol in artifical membranes, 295
Photoinhibition
increased heat emission and its relationship to the xanthophyll cycle in pea leaves exposed to strong light stress, 361
Photoproduct
variation in the fluorescence decay properties of haemetoporphyrin derivative during its conversion to photoproducts, 103
Photosensitization
electron-acceptor-sensitized splitting of cyclobutane-type thymine dimers, 27
intracellular sensitizer fluorescence: microfluorometry and fluorescent spectroscopy, 39

of what value is a highly absorbing photosensitizer in PDT?, 223
the role of the low density lipoprotein receptor pathway in the delivery of lipophilic photosensitizers in the photodynamic therapy of tumours, 351
photochemical and photosensitizing properties of monomeric and dimeric Sn(IV)-protoporphyrin, 159
photosensitized damage of bilayer lipid membrane in the presence of haematoporphyrin dimethylether, 315
photosensitizing action of furocoumarins on membrane components and consequent intracellular events, 235
radical intermediates induced by porphyrin triplets, 97
temperature effects on photosensitized processes, 419
Photosynthesis
electron transfer and proton uptake of photosynthetic bacterial reaction centre reconstituted in phospholipid vesicles, 263
increased heat emission and its relationship to the xanthophyll cycle in pea leaves exposed to strong light stress, 361
Photosynthetic apparatus
functional changes in the photosynthetic apparatus during light adaptation of the green alga *Chlorella fusca*, 63
Photosystem I
monitoring oxygen reduction by photosystem I in whole thylakoid membranes using a photoelectrochemical cell, 17
Photosystem II
nanosecond fluorescence of chloroplasts as a probe for electron transfer disruption in photosystem II, 175
Phototoxicity
photodegradation of piroxicam under aerobic conditions. The photochemical keys of the piroxicam enigma?, 199
Phototransformation
incorporation of photoreduced protochlorophyll into reaction centres, 255
Phthalocyanine
the possible role of ionic species in selective biodistribution of photochemotherapeutic agents toward neoplastic tissue, 1
Piroxicam
photodegradation of piroxicam under aerobic conditions. The photochemical keys of of the piroxicam enigma?, 199
Porphyrins
the possible role of ionic species in selective biodistribution of photochemotherapeutic agents toward neoplastic tissue, 1
the role of the low density lipoprotein receptor pathway in the delivery of lipophilic photosensitizers in the photodynamic therapy of tumours, 351
radical intermediates induced by porphyrin triplets, 97
variation in the fluorescence decay properties of haemetoporphyrin derivative during its conversion to photoproducts, 103
Potassium
sodium and potassium in the lens after exposure to radiation in the 300 nm wavelength region, 279
Procaine
coloured complexes of all-*trans*-retinal with benzocaine and other local anaesthetics, 183
Protochlorophyll
incorporation of photoreduced protochlorophyll into reaction centres, 255
Protochlorophyllide
incorporation of photoreduced protochlorophyll into reaction centres, 255
Proton binding
electron transfer and proton uptake of photosynthetic bacterial reaction centre reconstituted in phospholipid vesicles, 263
Pseudocyclic electron flow
monitoring oxygen reduction by photosystem I in whole thylakoid membranes using a photoelectrochemical cell, 17

Psoralens
photobinding of psoralens to DNA in the dark by triplet ketones generated thermally from dioxetanes, 431

Quantitative estimation
detection and quantitative estimation of metalloporphyrins *in vivo*, 409
Quantum-mechanical model calculations
UV–visible absorption and circular dichroism spectra of the subunits of *C*-phycocyanin. II: A quantitative discussion of the chromophore–protein and chromophore–chromophore interactions in the subunit, 129
$^1O_2$-quenching rate constants
interaction between singlet oxygen and biologically active compounds in aqueous solution. II. Physical and chemical $^1O_2$-quenching rate constants of 6,6′-diapocarotenoids, 51

Radical ions
electron-acceptor-sensitized splitting of cyclobutane-type thymine dimers, 27
Radiotherapy
synergism between electricity and ionizing radiation, 371
Rat
sodium and potassium in the lens after exposure to radiation in the 300 nm wavelength region, 279
Reaction centres
incorporation of photoreduced protochlorophyll into reaction centres, 255
Receptors
photosensitizing action of furocoumarins on membrane components and consequent intracellular events, 235
Recombinant tumor necrosis factor-α
potentiation of photodynamic therapy in mice with recombinant human tumor necrosis factor-α, 203
Respiratory-deficient *Saccharomyces*
luminescence spectra of exponential and stationary phase cultures of respiratory deficient *Saccharomyces cerevisiae*, 169
Retinal
coloured complexes of all-*trans*-retinal with benzocaine and other local anaesthetics, 183

Rhodobacter sphaeroides
electron transfer and proton uptake of photosynthetic bacterial reaction centre reconstituted in phospholipid vesicles, 263
Rhodopsin activation
spectral sensitivity, structure and activation of eukaryotic rhodopsins: activation spectroscopy of rhodopsin analogs in *Chlamydomonas*, 385

Scenedesmus
incorporation of photoreduced protochlorophyll into reaction centres, 255
Schiff base
coloured complexes of all-*trans*-retinal with benzocaine and other local anaesthetics, 183
Second messengers
photosensitizing action of furocoumarins on membrane components and consequent intracellular events, 235
Selective biodistribution
the possible role of ionic species in selective biodistribution of photochemotherapeutic agents toward neoplastic tissue, 1
Singlet oxygen
interaction between singlet oxygen and biologically active compounds in aqueous solution. III. Physical and chemical $^1O_2$-quenching rate constants of 6,6′-diapocarotenoids, 51
photochemical and photosensitizing properties of monomeric and dimeric Sn(IV)-protoporphyrin, 159
temperature effects on photosensitized processes, 419
variation in the fluorescence decay properties of haemetoporphyrin derivative during its conversion to photoproducts, 103
Sodium
sodium and potassium in the lens after exposure to radiation in the 300 nm wavelength region, 279
Spectral sensitivity
spectral sensitivity, structure and activation of eukaryotic rhodopsins: activation spectroscopy of rhodopsin analogs in *Chlamydomonas*, 385

Sugar beet
effect of ultraviolet radiation and visible light on growth, fluorescence induction, ultraweak luminescence and peroxidase activity in sugar beet plants, 73

Thionine dye
photoinduced interaction of thionine with phospholipid and cholesterol in artifical membranes, 295
Thylakoid membranes
monitoring oxygen reduction by photosystem I in whole thylakoid membranes using a photoelectrochemical cell, 17
Thymine dimers
electron-acceptor-sensitized splitting of cyclobutane-type thymine dimers, 27
Time-resolved fluorescence
a study of the chlorophyll fluorescence from nature and micropropagated *Clematis* by time-resolved spectroscopy, 307
Tin-protoporphyrin
photochemical and photosensitizing properties of monomeric and dimeric Sn(IV)-protoporphyrin, 159
TNF
potentiation of photodynamic therapy in mice with recombinant human tumor necrosis factor-α, 203
Tocopherols
role of tocopherols in the protection of biological systems against oxidative damage, 211
Triplet lifetime
variation in the fluorescence decay properties of haemetoporphyrin derivative during its conversion to photoproducts, 103
Tumor
the possible role of ionic species in selective biodistribution of photochemotherapeutic agents toward neoplastic tissue, 1
Tumor necrosis factor
potentiation of photodynamic therapy in mice with recombinant human tumor necrosis factor-α, 203

Ultraviolet (UV)
synergism between electricity and ionizing radiation, 371
Ultraweak luminescence
effect of ultraviolet radiation and visible light on growth, fluorescence induction, ultraweak luminescence and peroxidase activity in sugar beet plants, 73
UV radiation
sodium and potassium in the lens after exposure to radiation in the 300 nm wavelength region, 279
tanning with UVB and UVA: an appraisal of risks, 218
UV radiation as an environmental stress in plants, 337
UV-visible absorption
UV–visible absorption and circular dichroism spectra of the subunits of *C*-phycocyanin. II: A quantitative discussion of the chromophore–protein and chromophore–chromophore interactions in the subunit, 129
UVB and UVA radiation
effect of ultraviolet radiation and visible light on growth, fluorescence induction, ultraweal luminescence and peroxidase activity in sugar beet plants, 73

Water pores
photosensitized damage of bilayer lipid membrane in the presence of haematoporphyrin dimethylether, 315
Wheat chloroplasts
nanosecond fluorescence of chloroplasts as a probe for electron transfer disruption in photosystem II, 175

X-rays
synergism between electricity and ionizing radiation, 371
Xanthophyll cycle
increased heat emission and its relationship to the xanthophyll cycle in pea leaves exposed to strong light stress, 361
